Introduction

Survey preparations were done during the fall of 2006. They included consultations with UNRWA as well as the two Popular Committees of Ein El-Hilweh and the NGOs operating there. The survey sample relied on a building and population census carried out by the Palestinian Central Bureau of Statistics (PCBS), the Damascus office, in 1998. A three-stage sampling approach was followed. In stage one, 640 building structures were chosen from among altogether 3,413 building structures in the frame, stratified according to size. In stage two, all households in the selected building structures were re-listed before making a random selection of one or more households from each building depending on its size. In total, 904 households were selected. The sampling also involved a third stage, whereby one person aged 15 and over was randomly selected from each household to answer questions tapping into the person's attitudes and opinions on certain issues.

The fieldwork team underwent a six-day interviewer training course just before the implementation of the survey. The first four days were in-house training, while the last two days of training consisted of field practices and subsequent discussions of experiences with fellow team members and instructors. Supervisors received additional instruction as did coders, editors and data entry operators.

Fieldwork lasted about three weeks, from 12 February to 3 March 2007. Due to the re-listing of households in the selected housing structures preceding the fieldwork, the response rate was very high, at 98.3 percent. Data quality is good.

Reading the Tabulation Report

All tables provide results as percentages and most give the un-weighted number of observations for all background variables. To fully understand the content of the tables, it might sometimes be useful to consult their footnotes, which e.g. may contain supplementary information regarding the respondents and variable definitions. Likewise, the below list of key concepts and acronyms may prove helpful.

Key Concepts and Acronyms

Household questionnaire	The household questionnaire contains questions about housing conditions and the environment surrounding the dwelling. Further, it contains a so-called “roster” where core information about each household member is filled, such as gender and age, health status, current school enrolment and educational achievements, and employment status. Finally it collects data about the household as an economic unit, principally income and durable goods.
RSI questionnaire	This questionnaire poses questions where the respondent is not providing ‘objective’ information about the household and its members, but reveals his or her personal opinions and attitudes with regard to a variety of issues. Examples are ‘women and employment’, and satisfaction with education and health services.
Respondents	The main respondent of the household questionnaire is the household head, or other knowledgeable adult who is home at the time of visit. If the head is employed and working outside the home but in the vicinity of the home, he or she is usually fetched at his or her working place. Else, the housewife is often the main respondent. More often than not, however, more than one respondent is present during the interview thus ensuring that correct information is provided. The respondent to the RSI questionnaire was selected randomly among all household members aged 15 and above, using a so-called Kish table.
Household	A household is an individual or a group of individuals, who are usually related (but need not be so), and who reside in the same dwelling unit, or in more than one dwelling unit located close together, and pool their resources together. Usually this entails having a common food arrangement. If a son has married and occupy a room in the same house as his parents but contribute to the overall economy of the parents and his siblings and eat with them, they would all be members of one household (an extended family). However, if the newly-weds were to have a separate entrance to their room and had established a separate economy, including eating most meals alone, they would have formed a new household.
Household head	The household head is the person who manages or is considered responsible for the household. This person may be appointed on the basis of age, sex, economic status (main provider), or some other reason. It is up to the respondents to define who the head is, but it must be one of the household members.

Household income	The survey asked the household to list 35 different (grouped) income sources and for each source the household reported incomes for the past 12 months and for certain income types for the past month. We constructed a 'household income' variable and assigned the households to five values (lowest, low, middle, high, and highest) according to their total annual incomes so that the five groups contained approximately the same number of households.
Asset index	The asset index variable is based on an extensive list of 25 durable goods that the household might possess, as well as certain aspects of the dwelling implying a decent housing standard. The durable goods are: refrigerator, gas or electric stove (cooking), gas or electric oven (heating), kerosene or diesel oven (heating), electric fan, washing machine, dishwasher, vacuum cleaner, sewing machine, mix-master/electric blender, radio, TV set, cable TV, satellite dish, video player, DVD player, photo camera, video camera, ordinary telephone, mobile telephone, personal computer, internet connection, air conditioner, car/ truck, and motorbike. Aspects of the housing that were considered when constructing the index are: space (room) per person; extra space such as garden, compound, balcony, roof, shop, and workshop; toilet; garbage being collected; relative stability in water delivery; and ownership status. The various durables and positive housing features were counted, and all households sorted into five groups of almost identical size according to their score, ranging from 'lowest' to 'highest'.
Labour force participation	<p>The survey applied the framework of the International Labour Organization (ILO) and a one-week reference period.</p> <p>All persons aged 15 and above are considered to be in working age. If a person had carried out any activity for at least one hour during the seven days preceding the day of the interview and that activity was done for a wage or salary, for profit (if self-employed), or as unpaid family labour in any enterprise that produces goods and services for the market, the person is considered economically active, or a member of the labour force. (People can be paid in money or in kind.)</p> <p>Labour force members are either employed (working at least one hour the past week) or unemployed (not working – according to the above definition – and actively seeking work).</p> <p>Next, according to this framework, labour force members can be considered as underemployed if they work too few hours or in a field that is less productive than and not in accordance with their education and skills.</p> <p>Finally, some of those who are defined outside of the labour force are discouraged workers, meaning that they have lost hope of finding a job and hence are not looking for one any longer. If the discouraged are included in the labour force, the size of the labour force and the unemployment rates increases, the latter significantly in the case of Palestinians in Lebanon.</p>

Literacy	In this survey we defined literacy based on two questions about people's actual reading and writing skills, not assuming, for example, which is frequently the case in surveys in Arab countries, that once a person has completed elementary schooling (or a certain grade), he or she is, by definition, literate. Our approach, we believe, provides more realistic estimates.
EHC	Ein El-Hilweh Camp
LL	Lebanese Lira (pounds)
RSI	Randomly Selected Individual. Person aged 15 and above selected randomly from within each household using a Kish table (see sampling appendix in Volume II).
USD	U.S. Dollar
() empty cell	If a cell of a table does not contain any value (is left blank), it implies that no respondent – in a particular group of respondents (e.g. women in a certain age group) gave that particular answer, or has been allocated that value on the variable.
(-) a dash	A dash (-) in a table cell indicates a value of less than 0.5 percent, i.e. that less than 0.5 percent of the respondents (but at least one) gave that answer, or were assigned that value.

The Tables

1 The dwelling and its surroundings

- 1.1 Type of location
- 1.2 Number of rooms in living quarters
- 1.3 Number of persons per room in living quarters
- 1.4 Additional space
- 1.5 Type of toilet
- 1.6 Disposal of garbage
- 1.7 Main source of water
- 1.8 Stable water supply
- 1.9 Storage tanks
- 1.10 Main source of drinking water
- 1.11 Opinion about drinking water quality
- 1.12 Ownership of living quarters
- 1.13 Actual rent or (if owned) estimated rent of living quarters at market rates
- 1.14 New space added to living quarters
- 1.15 Conditions inside the living quarters
- 1.16 Number of bad conditions inside the living quarters
- 1.17 Usually exposed to cigarette smoke inside the living quarters
- 1.18 Children usually exposed to cigarette smoke inside the living quarters
- 1.19 Usually exposed to noise so disturbing that normal conversation indoors are difficult
- 1.20 Assessment of the immediate surroundings of the dwelling
- 1.21 Bothered with smell from waste/ garbage
- 1.22 Bothered with smell from sewage
- 1.23 Very or rather satisfied with certain aspects of the housing
- 1.24 Very or rather satisfied with certain aspects of the living area
- 1.25 Very or rather satisfied with the overall housing conditions
- 1.26 Very or rather satisfied with the immediate surroundings of the dwelling (*hara*)

2 Household economy

- 2.1 Ownership of consumer durables (to be continued)
- 2.2 Ownership of consumer durables (continued)
- 2.3 Type of income sources in the past 12 months
- 2.4 Mean and median household income in the past 12 months (in LL 1,000)
- 2.5 Grouped household income
- 2.6 Grouped asset index
- 2.7 Mean and median household wage income in the past 12 months
- 2.8 Mean and median household self-employment income in the past 12 months
- 2.9 Mean and median household transfer income in the past 12 months
- 2.10 Mean and median household property and other income in the past 12 months

- 2.11 Economic situation in the past 12 months compared to 12 months before
- 2.12 Savings
- 2.13 Self-assessment of household economic situation
- 2.14 Household able to raise LL 300,000 within a week
- 2.15 Duration of households' difficult economic situation
- 2.16 Thoughts about the future economic situation

3 Population; chronic illness

- 3.1 Household size
- 3.2 Household type
- 3.3 Distribution of population by age and sex
- 3.4 Marital status
- 3.5 Marital status by gender and age
- 3.6 Nationality
- 3.7 Passport
- 3.8 Refugee status
- 3.9 Registered with UNRWA
- 3.10 Registered with the Lebanese Directorate for Refugee Affairs
- 3.11 Chronic physical or psychological illness, or disability
- 3.12 Difficult to go out without help because of chronic illness or disability (persons aged 2+)

4 Education

- 4.1 Ever attended school
- 4.2 Currently enrolled in school
- 4.3 Detailed school enrollment for those aged 6 to 20
- 4.4 Detailed school enrollment for boys aged 6 to 20
- 4.5 Detailed school enrollment for girls aged 6 to 20
- 4.6 Net enrollment in elementary school
- 4.7 Net enrollment in elementary school-BOYS
- 4.8 Net enrollment in elementary school-GIRLS
- 4.9 Net enrollment in intermediate school
- 4.10 Net enrollment in intermediate school-BOYS
- 4.11 Net enrollment in intermediate school-GIRLS
- 4.12 Net enrollment in secondary school
- 4.13 Net enrollment in secondary school-BOYS
- 4.14 Net enrollment in secondary school-GIRLS
- 4.15 Highest level of education completed
- 4.16 Repeated years of education in elementary, intermediate or secondary school
- 4.17 Repeated years of education in elementary, intermediate or secondary school-BOYS
- 4.18 Repeated years of education in elementary, intermediate or secondary school-GIRLS
- 4.19 Type of school currently enrolled in
- 4.20 Additional lessons in the same subjects as regular education

- 4.21 Receiving contributions to the educational expenses
- 4.22 Reasons for leaving or dropping out of school (to be continued)
- 4.23 Reasons for leaving or dropping out of school (continued)
- 4.24 Reasons for those aged 10-24 leaving or dropping out of school (to be continued)
- 4.25 Reasons for those aged 10-24 leaving or dropping out of school (continued)
- 4.26 Vocational courses attended now
- 4.27 Vocational courses attended before
- 4.28 Ever involved in voc. training outside the formal education system or on-the-job training
- 4.29 Type of training outside the formal education system or on-the-job training (to be continued)
- 4.30 Type of training outside the formal education system or on-the-job training (continued)
- 4.31 Duration of vocational courses
- 4.32 Sponsor of vocational courses
- 4.33 Type of training
- 4.34 Reasons to attend vocational training
- 4.35 Literacy
- 4.36 Literacy among men
- 4.37 Literacy among women

5 Labour force participation

- 5.1 Working age population
- 5.2 Working age population MEN
- 5.3 Working age population WOMEN
- 5.4 Labor force participation rate
- 5.5 Labor force participation rate MEN
- 5.6 Labor force participation rate WOMEN
- 5.7 Unemployment rate
- 5.8 Unemployment rate MEN
- 5.9 Unemployment rate WOMEN
- 5.10 Educational profile of the labor force
- 5.11 Educational profile of the labor force by gender
- 5.12 Age distribution of the labor force
- 5.13 Age distribution of the labor force by gender
- 5.14 Employment status of working age population
- 5.15 Employment status of working age population MEN
- 5.16 Employment status of working age population WOMEN
- 5.17 Employment status for economically active population
- 5.18 Employment status for economically active population MEN
- 5.19 Employment status for economically active population WOMEN
- 5.20 Relaxed unemployment rate
- 5.21 Long-term unemployment status for the economically active population
- 5.22 Economic activity of children

- 5.23 Work history
- 5.24 Ways of seeking work for those unemployed
- 5.25 Months spent actively looking for work
- 5.26 Reasons for not finding a job
- 5.27 Reasons for not looking for a job (to be continued)
- 5.28 Reasons for not looking for a job (continued)
- 5.29 Industry
- 5.30 Industry by gender and age
- 5.31 Occupation
- 5.32 Occupation by gender and age
- 5.33 Years worked in the current job
- 5.34 Employer
- 5.35 Employment status
- 5.36 Type of payment
- 5.37 Location of current job
- 5.38 Time to reach the place of work (minutes)
- 5.39 Hours spent in main job last week
- 5.40 Mean and median hours spent in main job last week
- 5.41 Ways obtained main job
- 5.42 Additional job
- 5.43 Reasons for not getting enough employment
- 5.44 Hourly wage past week
- 5.45 Mean and median hourly wage last week
- 5.46 Mean and median wage in all jobs last week (LL 1,000)

6 Working conditions

- 6.1 Number of employees at the workplace
- 6.2 Written contract
- 6.3 Extent of using school skills/ knowledge on the current job
- 6.4 Working schedule
- 6.5 Satisfaction with main job
- 6.6 Fear of losing main job
- 6.7 Degree of difficulty in finding a new job in case one loses the current one
- 6.8 How the main job was obtained
- 6.9 Obstacles to finding a job

7 People's opinions about education and health services

- 7.1 Assessment of education at UNRWA's intermediate school in Ein El-Hilweh
- 7.2 Important issues to be improved on at UNRWA's intermediate school
- 7.3 Opinions about the relationship between education and work
- 7.4 Parents' assessment of their child's education at elementary or intermediate school
- 7.5 Parents' opinion on issues to be improved at elementary or intermediate school

- 7.6 Parents' assessment of the education their child is receiving at UNRWA's KG/pre-school
- 7.7 Parents' opinion on important issues to be improved at UNRWA's KG/pre-school
- 7.8 Assessment of pregnancy control at UNRWA's clinics in Ein El-Hilweh
- 7.9 Assessment of UNRWA clinics in EHC on the treatment of chronic health problems
- 7.10 Assessment of UNRWA clinics in EHC on the treatment of acute illness
- 7.11 Aspects to improve at UNRWA's health clinics in Ein El-Hilweh (to be continued)
- 7.12 Aspects to improve at UNRWA's health clinics in Ein El-Hilweh (continued)

8 Relations between Ein El-Hilweh and Saida; attitudes toward female employment

- 8.1 Assessment of the security situation in Ein El-Hilweh
- 8.2 Assessment of the relationship between Saida and Ein El-Hilweh
- 8.3 Days leaving the camp in a normal week
- 8.4 Women should be allowed to work outside the house (opinion about statement)
- 8.5 Women should be allowed to take higher education (opinion about statement)
- 8.6 Women should be allowed to participate in voluntary social activities (opinion about statement)
- 8.7 Women should be allowed to drive cars (opinion about statement)
- 8.8 Women should be allowed to run a business (opinion about statement)
- 8.9 Women should be allowed to vote in elections (opinion about statement)
- 8.10 Women should be allowed to be a minister or parliamentarian (opinion about statement)
- 8.11 Married women should not have paid employment if she has a husband capable of supporting the family (opinion about statement)
- 8.12 Women should not try to combine a career and children (opinion about statement)
- 8.13 In times of high unemployment, married women should stay home (opinion about statement)
- 8.14 If the children are well looked after, it is good for a woman to work (opinion about statement)
- 8.15 Most women work only to earn money for extra, rather than because they need money (opinion about statement)
- 8.16 A pre-school child is likely to suffer if his or her mother works (opinion about statement)
- 8.17 Many housewives would turn to paid work if the availability of work were better (opinion about statement)
- 8.18 Housewives who would like to have paid work outside the home
