

SAMBIM I ET INNOVASJONS- PERSPEKTIV

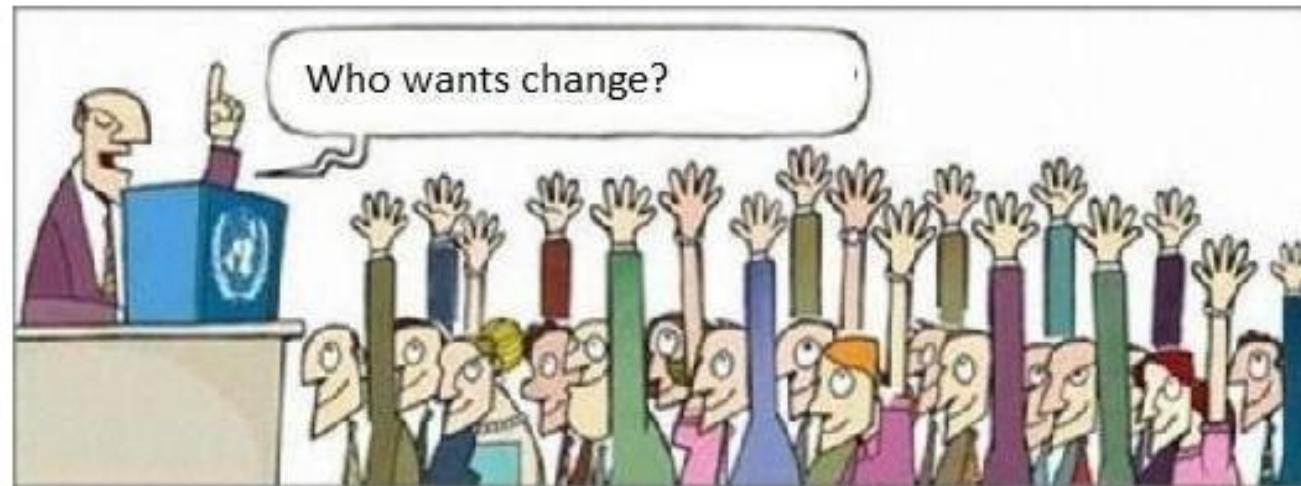

Anita Moum, sjef forsker, SINTEF Byggforsk
Lanseringsmøte hovedrapport SamBIM, 13.01.2017 hos Fafo

Islands of Automation in Construction

After the ice period 10.000 years ago the land is still slowly rising and exposing new terrain never before stepped on by man.

The challenge is to build bridges between the islands while new islands are constantly appearing.
