Platform economy database

Eurofound's Platform Economy Database [↗](#) provides information on initiatives and court cases that exist or have been implemented in relation to activities in the platform economy. This database provides metadata for each entry, such as geographical scope, year, type of initiative, actors involved, sector and companies concerned. Initiatives include legal instruments such as legislative changes or court decisions, as well as voluntary interventions undertaken by different stakeholders to address issues around platform work.

Title	Type	Countries	Published
